# EVTM Newsletter June 2020

## “NO EGO, JUST GOOD SCIENCE AND COLLABORATION”

EndoVascular resuscitation and Trauma Management (EVTM) is all about collaboration, continuously aiming at connecting people, stimulating discussion and developing the science behind this fascinating area of medicine. At the 33rd annual ESVS meeting in Hamburg back in September 2019, there was a successful EVTM session on modern endovascular management of vascular emergencies. To continue this collaboration between two innovative societies, in a time when travel is difficult and social distancing is of upmost importance, EVTM and ESVS have decided to join forces once again and hold a special REBOA webinar.

On the 17<sup>th</sup> of June, join us for a live, web-based discussion on the use of REBOA in hemodynamic instability. The webinar is free to participate via Zoom, but also available on demand on both EVTM and ESVS websites. The program will cover all aspects of REBOA use with 6-minute talks followed by open discussions with vascular surgeons from all around the world, sharing their experience, thoughts and reservations about REBOA. We welcome you to join the EVTM platform by participating in the activities, taking part in the science and contributing to knowledge development.

### UPCOMING EVENTS

- [ESVS/EVTM REBOA Webinar](#)  
17 June, 2020 16:00 CEST.  
(Online)
- **Pan-Pacific Trauma Congress**  
3-5 Sept, 2020. South Korea
- **EVTM Workshop**  
Sept, 2020. Örebro, Sweden
- **EVTM Workshop**  
Sept, 2020. Örebro, Sweden
- **Carioca Vascular Meeting**  
24-26 Sept, 2020. Rio, Brazil
- **EVTM / 34<sup>th</sup> ESVS Month**  
September, 2020. Online
- **EVTM at VEITH**  
23-27 Feb, 2021. USA

# Clinical use of REBOA in hemodynamically unstable patients

17<sup>th</sup> June 2020

16:00-18:10 CEST

Join us for a live, web-based discussion on the use of  
REBOA for hemodynamic instability !

Hosted by Örebro University Hospital, Sweden

## How to attend?

Pre-registration, no fee, via Zoom on the ESVS and EVTM websites (*unrestricted participation*). Click [HERE](#) to pre-register. We welcome online live comments during discussions using the EVTM directed Zoom platform.

*Unable to attend?* The full webinar will be available on demand on the ESVS and EVTM websites [www.ievtm.com](http://www.ievtm.com) and [www.esvs.org](http://www.esvs.org)

## PROGRAMME

*6 minutes talk followed by discussions*

<b>16:00-16:10</b>	Welcome words and presentation of participants - <i>Pirkka Vikatmaa (Finland) and Stephan Haulon (France)</i>
<b>16:10-16:16</b>	REBOA is one of the tools of the EVTM endovascular resuscitation and Trauma Management concept- <i>Tal Hörer (Sweden)</i>
<b>16:22-16:28</b>	Vascular access for hemodynamically unstable patients; How and who? - <i>Carl Magnus Wahlgren (Sweden)</i>
<b>16:34-16:40</b>	Use of REBOA in trauma patients; Overview- What do we know? - <i>David McGreevy (Sweden)</i>
<b>16:46- 16:52</b>	Practical issues with REBOA placement and use - Tips and tricks – <i>Pirkka Vikatmaa (Finland)</i>
<b>16:58-17:04</b>	Practical issues with REBOA placement in trauma – Lessons - <i>Joseph DuBose (USA)</i>
<b>17:10-17:16</b>	REBOA in Post-Partum Haemorrhage (PPH) - <i>Megan Brenner (USA)</i>
<b>17:22-17:28</b>	Use of REBOA in rAAA - <i>Zoran Rancic (Switzerland)</i>
<b>17:34-17:40</b>	When not to use REBOA, risks and complications - <i>Artai Pirouzzam (Sweden)</i>
<b>17:46-17:52</b>	Future aspects of REBOA - What do we need to learn and know/ongoing studies/developments- <i>Junichi Matsumoto and Yosuke Matsumura (Japan)</i>
<b>18:00-18:10</b>	Round up discussion led by <i>Pirkka Vikatmaa, Stephan Haulon, Tal Hörer and speakers</i>
